

services

A one-stop-shop for creating inspiring digital products

We specialize in the design and development of outstanding, user-friendly websites, and apps. We have all the skills you need under one roof.

Managed Projects

Looking to launch your first digital product on the market? Want to expand your portfolio or add new features to an existing product? We can help.

Staff Augmentation

Are you looking for extra resources to bring your project to life? Need development support while you're backfilling roles in your team? If so, our staff augmentation service is right for you.

Web development

From back-end to front-end website development, we'll leave you with a product that's functional, effective and engaging to your end-users.

Technology Tools

Mobile

Smartphones, tablets, wearables - follow your users where they are with carefully crafted mobile apps. Reach customers via Android, iOS, or cross-platform solutions.

iOS App Development
Android App Development
Flutter Development
React Native Development

Design

Our team's skills and abilities range from the research and design of complex web and mobile experiences, through to illustration, motion design, and brand design.

Product Design

Illustration
Consultancy

Machine Learning

Our team's skills and abilities range from the research and design of complex web and mobile experiences, through to illustration, motion design, and brand design.

Deep Neural Networks
Natural Language Processing
Face ID
Automatic speech recognition

DevOps

Our developers and operations teams work together to provide you with highly available and reliable infrastructure, and in doing so, to deliver your product faster.

Developing in DevOps culture, in private and public cloud
Infrastructure as a code
CI/CD processes
Monitoring and maintenance

Blockchain

If you're looking for someone to help you launch your DApp, Exchange, or Wallet or to provide Smart Contract development, R&D, or consultancy - this is our domain.

ICO Development and Launch
DApp Development
Smart Contract Development
Private Blockchain Development

Testing

We help our clients avoid system bugs, UX issues, and a whole host of seemingly small errors, which, if left untreated, could lead to larger-scale problems.

Let's work together
